

CONTRACTOR LOCKOUTS

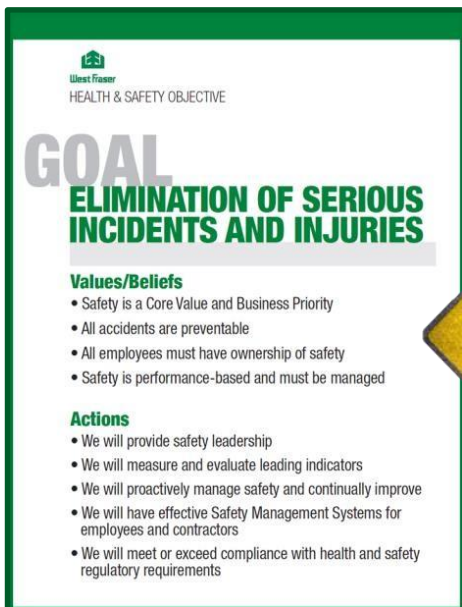

Did you know?

Many of our serious injuries and fatalities have been suffered by Contractors over the past several decades.

No one's simple mistake should cost them their life!

Think Safety First!

At each West Fraser division, lock out is performed on the equipment an average of 500 times per week. That is almost 2 million times per year. Even if we are 99% accurate, that means we still have 20,000 incorrect lock outs per year. The risk is too high NOT to do lock out verification

West Fraser
HEALTH & SAFETY OBJECTIVE

GOAL

ELIMINATION OF SERIOUS INCIDENTS AND INJURIES

Values/Beliefs

- Safety is a Core Value and Business Priority
- All accidents are preventable
- All employees must have ownership of safety
- Safety is performance-based and must be managed

Actions

- We will provide safety leadership
- We will measure and evaluate leading indicators
- We will proactively manage safety and continually improve
- We will have effective Safety Management Systems for employees and contractors
- We will meet or exceed compliance with health and safety regulatory requirements

Expectations:

- A pre-job hazard assessment must be completed prior to starting the job.
- All sources of Energy must be confirmed as locked out as required.
- Other than Group lockout, personal locks or hold locks and tagout must be applied to each lockout point.
- Must be completed by 2 employees (educated, trained and competent) confirming and documenting the lockout AND observing (verifying) the Contractor applying their personal lock to the lockout point.

“safety is a core value and business priority”
