

FIRE WORKS

"safety is a core value and business priority"

When using fireworks, it's essential to take precautions to ensure the safety of yourself and others around you. Here are some precautions you can follow to prevent accidents and injuries:

- ☐ **Follow local laws and regulations:** Understand and abide by the laws and regulations regarding the use of fireworks in your area. Obtain the necessary permits and licenses if required

- ☐ **Read and follow instructions:** Carefully read and understand the instructions provided with the fireworks. Follow the manufacturer's guidelines regarding handling, lighting, and safety precautions.

- ☐ **Dispose of fireworks safely:** After the fireworks display, douse used fireworks with water to ensure they are fully extinguished. Allow them to cool down before disposing of them in a designated trash container.

- ☐ **Choose an appropriate location:** Select a clear and open outdoor area away from buildings, dry grass, or other flammable materials.

- ☐ **Keep water sources nearby:** Have a bucket of water, a garden hose, or a fire extinguisher readily available in case of an emergency or accidental fires.
