

# Holiday Safety

Be **Smart**  
Stay **Safe**

Here are some **tips** to help with site security:

## Secure Your Vehicle

Always lock your doors and roll up your windows (including sunroof) when you park. Activate your security system if you have one.

## Secure Personal Property

Before you get out of your car, make sure your valuables are out of site. Avoid leaving anything visible in the car (sunglasses, phone, keys, purse or wallet, laptop or its bag, backpacks, loose change, etc.).

## Encountering Unknown Persons

Never jeopardize your safety by acting alone when challenging or even approaching a stranger, regardless of how unthreatening the person may appear.

If you see someone on site or inside the mill, and you are unsure that they should be there, notify your Supervisor. If you feel comfortable approaching them, confirm who their QRP Job Supervisor is (if they are a contractor), to ensure site orientation.
