

# MIND ON TASK

*"safety is a core value and business priority"*

In challenging times, our focus can be diverted away from the hazards within our workplace.

When people are distracted, they are not paying attention, forgetful about safety systems and can fail to see hazards, which can lead to injuries.

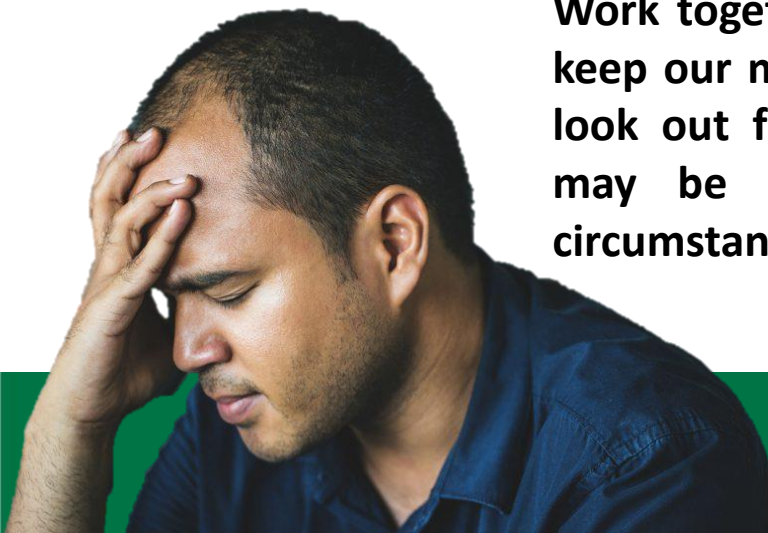

Our FLHA, Lockout Verification, SWP and Supervisor Observation programs are all systems designed to assist with the adversities we are facing.

**We All Need To  
Look Out For  
Each Other**

Work together and remind each other to keep our minds on the tasks at hand and look out for our fellow employees who may be struggling with our present circumstances.
