#19-1

## West Fraser Safety Policy #19-1 (Mobile Equipment & Pedestrian Interface )

States:

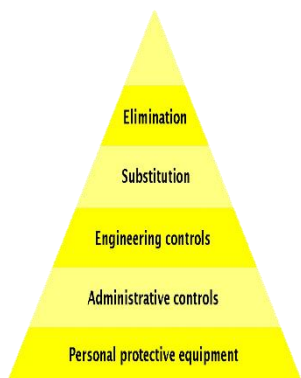

### Hierarchy of Controls

Each Division's hazard / risk assessment must first evaluate the practicality of eliminating the interface utilizing a hierarchy of controls

- **Eliminate / Substitute** – Alternate routes for the mobile equipment or pedestrians.
- **Engineering** – Designated or delineated walkways.

Where practical, separate mobile equipment traffic through physical barriers such as cement blocks or barriers, brow logs, bull rails, or other fixed barriers.

- **Administration** – Implementation of control zones to eliminate potential interface utilizing permitted areas or written procedures.
- **PPE** – Hi Visibility Apparel
