

# Summer Distractions

*"safety is a core value and business priority"*

## Did You Know:

Recent historical statistics have shown us that the rate of injuries at West Fraser Divisions, goes up during the summer months. **Why?**

One reason is, during the summer months our minds can often be distracted with thoughts of vacations and summer activities.

I wonder how many rounds of golf I will get in this year?

Should I upgrade my ATV this year?

I hope the weather is good this weekend?

Did I buy enough steak for tonight?

**Do I hear a Forklift?**

At West Fraser, we work in High Risk environments and we always need to keep on focus on our work task.

***STAY FOCUSED / STAY SAFE***
