

# Wood Dust Mitigation and Control

**When working with combustible  
dust there are some very important  
Do's and Don'ts**

## DO

- Inspect and maintain all equipment
- Report any high-accumulation areas to supervisor
- Have fire extinguishers available while conducting hot work

## DON'T

- Don't allow dust to accumulate in machine control areas
- Don't smoke in areas where combustible dust is present
- Don't disperse dust by using compressed air
