

# Driving in Winter Weather

Supervisor  
Crew  
Talk

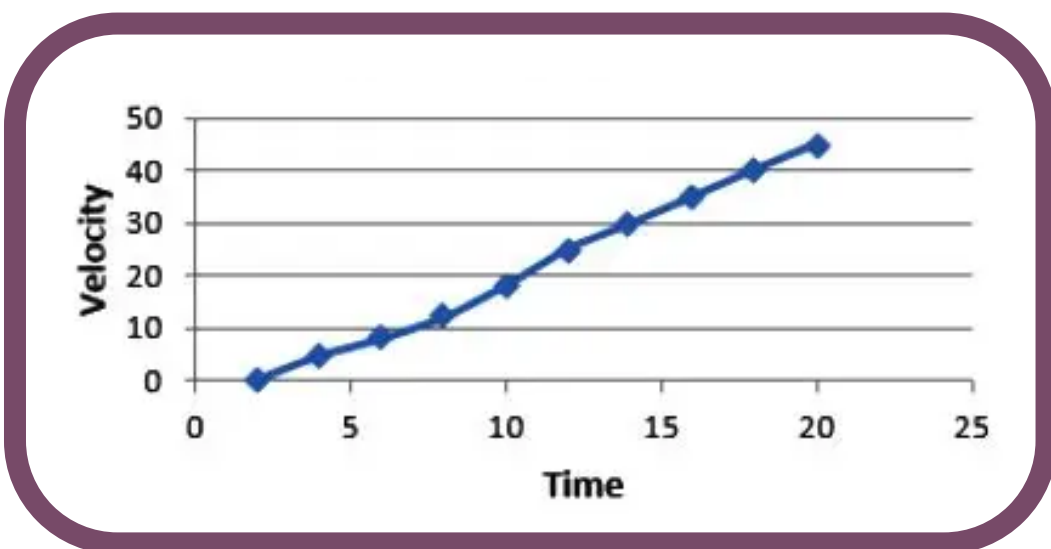

*In icy, winter conditions, it's best to avoid driving when not necessary. However, if you need to travel somewhere, try to follow these tips and drive as slowly as possible.*

*Increase your follow distance*

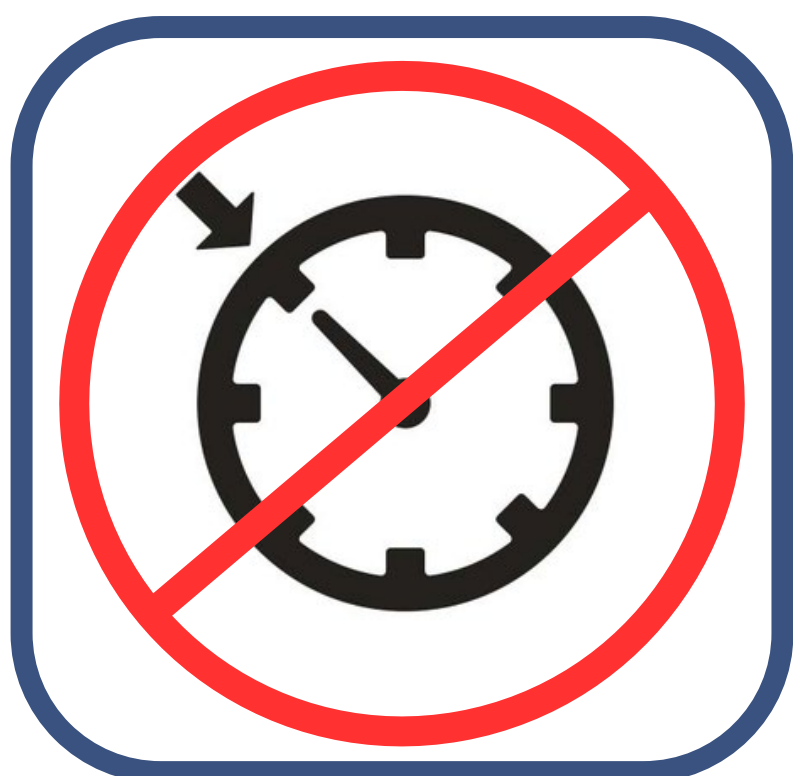

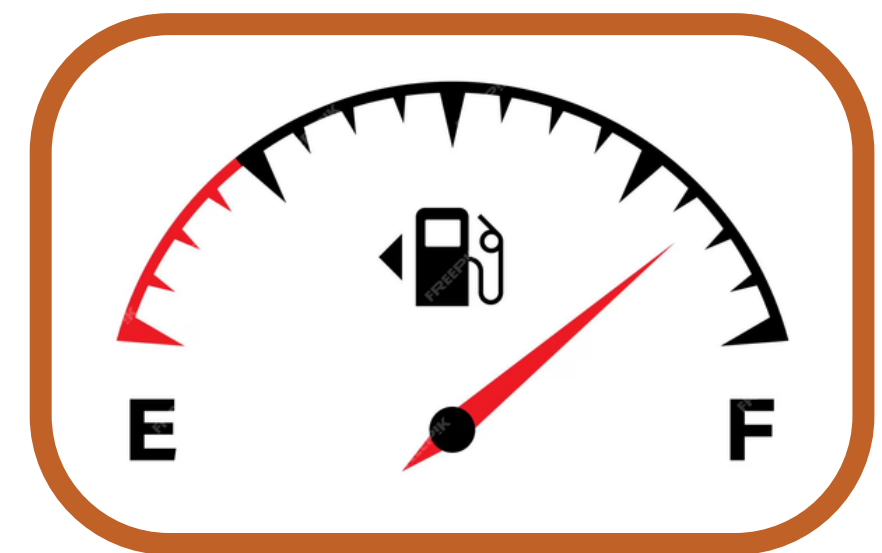

*Try not to brake hard or stop suddenly*

*Never brake going up a hill*

*Accelerate and decelerate slowly*

*Make sure the tank is always at least half full.*

*Don't use cruise control*

*"Safety is a core value and business priority"*
