

Driving in School Zones

Supervisor
Crew
Talk

When driving in a school zone:

Slow down

Always follow the posted speed limits.

Look out for crosswalks

Drive carefully when you're near bus stops or school entrances, as those are common locations for crosswalks.

Be prepared to stop

Always stop when a school bus has its red light flashing and stop-arm extended.

Avoid distractions

You should always avoid distractions when driving, but your full attention is needed to anticipate and react to the unpredictable movements of children.
