

Placing Hot Work Permits

Supervisor
Crew
Talk

Once filled out and approved, hot work permits should be displayed in a safe, visible, and easily accessible location near the hot work.

Clearly visible from multiple angles
In a safe, accessible area
In the hot work area, but a safe distance away

Too close to the hot work
Not clearly visible
Unsafe to approach

Never place a hot work permit behind removed guarding that requires a lockout to access.

The top portion of the permit should be hung in the area where the hot work will be performed.

The smaller, bottom portion of the permit should be hung in its designated area where Fire Patrol Personnel
