

Plane of Entry

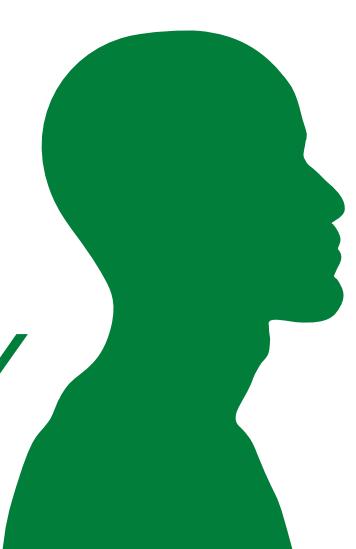

You don't have to fully step into a confined space to have entered it.

West Fraser policy defines a confined space entrant as any person whose nose or mouth crosses the plane of entry.

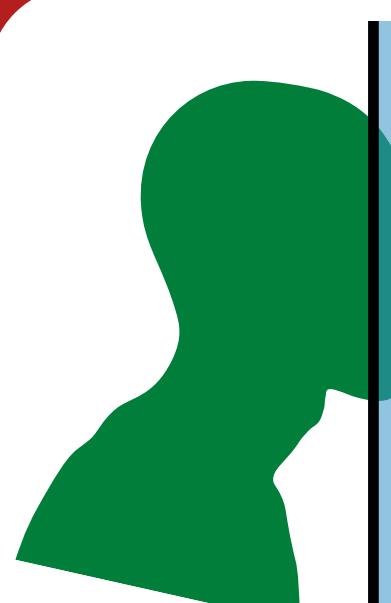

If you're working around a confined space entrance, don't stick your head in to take a look. This would count as entry, and is unsafe if the proper preparations haven't been made.

Not a confined space entry

Confined space

Confined space entry

Confined space

If someone accidentally crosses the plane of entry while confined space work is happening, the entry must be recorded with the other entries, with the entrant's name and enter/exit time.

Even if it was just for a second.

Lockout											
Lockout/Iso. Procedure Available At/After											
Machinery & Equipment Requiring Lockout/Iso. if procedures not attached

TYPES OF GASES TESTED		LIMITS		GAS TEST RESULTS							
Gas	Max Acceptable Limit	Fresh Air Test	Start Air Monitoring	Time	Time	Time	Time	Time	Time	Time	Time
On	20.7% - 21.1%										
Off	5% LEL (Under 5% LEL - Qualified)										
LEL	10% LEL (Under 10% LEL - Qualified)										
H2S	0 ppm (50% STEL Exposure Limit)										
CO	0 ppm (50% STEL Exposure Limit)										
HCH	0 ppm (50% STEL Exposure Limit)										
MDI	0 ppm (50% STEL Exposure Limit)										
DRH	0 ppm (50% STEL Exposure Limit)										
No entry allowed following test results exceeding 50% of the exposure limit. If entry is required, the limits outside the limits are determined.
