

Safety Glasses

West Fraser's #20 PPE Policy states that impact resistant safety glasses (with approved side shields) must be worn by all West Fraser employees who work in, or are passing through, production and/or construction areas.

Missing
side shields

Safety glasses must meet applicable standards (ANSI Z87.1, CSA Z94.2, or another standard acceptable to the regulator).

*Non-CSA temporary
side shields are not
acceptable!*

Not CSA approved

CSA approved

Prescription glasses don't count as safety glasses, unless they're prescription safety eyewear (complete with side shields). If you wear non-safety glasses, you must wear "over style" safety eyewear over them.

"Safety is a core value and business priority"
