

# Driving when School Starts

***When school starts, the traffic patterns change!***

When you're driving near buses and schools take extra care to:

## ***Slow down in school zones***

A pedestrian struck by a car traveling at 40 km/h (25 mph) is nearly two-thirds less likely to be killed compared to a pedestrian struck by a vehicle traveling 55 km/s (35 mph)

## ***Come to a complete stop at stop signs***

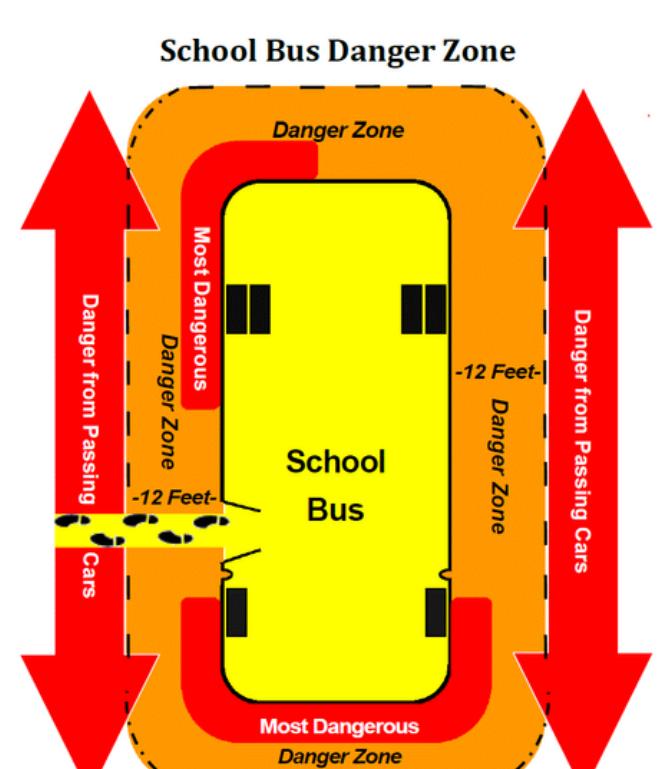

More than one-third of drivers roll through stop signs in school zones or neighborhoods. Always come to a complete stop and check carefully for children on sidewalks and in crosswalks.

***Observe the school bus laws in your area, whether you're near a school or not.***

Never pass a bus when it's stopped to load or unload children.

The area 3 m (10 ft) around a school bus is the most dangerous for children, stop far enough back to allow them space to safely walk and enter or exit the bus.

***"Safety is a core value and business priority"***
