

# Pike Pole Handling and Storage

Supervisor  
Crew  
Talk

***Incorrect handling of pike poles can lead to injuries.***

- The pole should be gripped with both hands.
- The handle end should be positioned to the side of the body.
- Make sure fingers, hands, and feet are clear of objects where they can be pinched.
- Pike poles should only be handled from the hands end, NOT the pointed end (pictured).
- Pike poles should never be thrown.

- When not in use, pike poles should be placed in their holders (below).
- Poles left in walkways (right) pose as a tripping hazard to workers.

***“Safety is a core value and business priority”***
